

Primary Care Physician Coordination

Coordinating your care with your Primary Care Physician offers you the most comprehensive treatment. This is an opportunity for your medical and mental health professionals to discuss how any medical conditions you may have could affect your mental health issues, or how any mental health issues could affect any medical conditions you may be experiencing. While we always encourage coordination of care with your medical doctors, you must first sign a consent to allow us to release this information:

Please check one of the following and sign below:

- I do not have a primary care physician.

- I refuse to give permission for my therapist or doctor to either correspond by letter or discuss over the telephone any information about my mental health issues.

- I give permission for Comprehensive Counseling Services, LLC and my primary care physician or other designated health care provider to exchange information regarding coordination of my medical and mental health issues.

If you are consenting to coordination of care between your therapist or psychiatrist and your medical doctor, please list the contact information for your medical doctor:

Name of Doctor _____

Address _____

City/State _____

Zip Code _____

Phone Number _____ () _____

Name (print): _____

Signature: _____

Date: _____
